Library Announces May Programs

A variety of exhibitions, exhibition-themed programs, and special children's events highlight the May schedule for the Newark Public Library, 5 Washington Street. All are free and open to the public. For more information, patrons should call the number listed with the program description. Some additional details may be available at www.npl.org for adult programs and at KidsPlace.npl.org for children's programs, or by visiting the library's blog at <http://www.nj.com/newark/npl>.

Installed in the third-floor gallery is ***The History of Fine Printing: With a Special Salute to the Richard C. Jenkinson Collection of Notable Books and Broadsides***. Nearly 85 years ago, the library received a donation of 288 books showing off the work of fine presses and the art of printing. The collection was from Richard C. Jenkinson, who at that point was a 30-year veteran as a library trustee and the current Board President. Today, the collection stands at more than 3,600 titles, representing over 800 presses. A number of books are highlighted in this exhibition, which is curated by William J. Dane and Chad Leinaweaver, Special Collections Division. It will be on view through July 1. The New Jersey Council for the Humanities provided valuable funding to mount this show and two related programs.

Monumental works of printing from within the library's collections will also be shown, including a page from an original Gutenberg Bible from the 1400s, a 1493 copy of the Liber Chronicarum (the "Nuremburg Chronicle"), and Denis Diderot's *Encyclopédie, ou Dictionnaire Raisonné des Sciences, des Arts et des Métiers*, a massive multi-volume set published in France from 1751-1777. The show features some of the mechanics of printing and fine press books, and chronicles the men behind this major collection concerning fine printing at the Newark Public Library—John Cotton Dana, the library's legendary second director, and Jenkinson himself.

Two programs will be presented during the exhibition's run. "The History of Fine Printing: Exhibition Talk and Film Showing of *The Machine That Made Us*" will take place on Thursday, May 7 at 2pm. Stephen Fry hosts and appears in this video history of Johannes Gutenberg and the movable type press. A discussion with the curators and tour of exhibition highlights will follow the film. The second program, "Examining the Importance of Printing and the Book: A Panel Discussion," will be held on Tuesday, May 12 at 2pm. Two distinguished speakers will share their expertise in design and

printing arts from a contemporary viewpoint: Michael Joseph, Rutgers University Libraries; and Jerry Kelly, freelance designer, calligrapher and partner in the Kelly/Winterton Press.

For more information on *The History of Printing* and the related programs call 973-733-7745.

The Revival of Professional Baseball in New Jersey is installed in the second-floor gallery through June 27. This historical and entertaining show features baseball in Newark, Jersey City and Paterson. It was curated by librarian James Lewis of the Charles F. Cummings New Jersey Information Center. Funding for this project comes from an Operating Support Grant from the New Jersey Historical Commission, a division of the Department of State. Fans of all ages will learn about Newark's first professional team, the Newark Peppers of the Federal League, while taking a nostalgic look at the glory years of Newark baseball. Contemporary Garden State-based teams of the Atlantic League, Can-Am League, Eastern League and South Atlantic League will be covered in dramatic photographs and memorabilia. Special thanks for the development of this exhibition go to Bob Golon, author of *No Minor Accomplishment: The Revival of New Jersey Professional Baseball*.

Complementing the exhibition will be a May 6 program in the main library's Auditorium, beginning at 6pm. Filmmaker Bryan Persons and author Bob Golon will discuss and present a documentary on the resurgence of baseball in the Garden State. Despite attempts to revive baseball, it was essentially non-existent in New Jersey from 1951-through 1993. Persons' film takes the audience on a guided tour of New Jersey minor league and independent professional baseball. Golon's book tells the history of the New Jersey pastime from not only a baseball perspective, but from community, state and fan points of view. Person is a Communication senior at Rider University; Golon is a Project Archivist at Princeton Theological Seminary. A reception with the filmmaker and the exhibition curators follows the presentations. For more information about this baseball retrospective call James Lewis at 973-733-7775.

The **Frances E.W. Harper Literary Society**, which is dedicated to discussing books on the African Diaspora, will discuss Margaret Craven's *I Heard the Owl Call My Name* on May 6 at 6:30pm in the James Brown African-American Room. For more information on this program and the Society call 973-733-5411.

Hooray for Children, the series that is fun for the entire family, will present "Reading Is Cool—The Magic of Books" on May 2. Master magician Jim Vagias combines magic, humor, storytelling and audience participation to motivate young people (and adults) to turn them onto books and reading. The program begins promptly at 2pm in Centennial Hall. Information: 973-733-7797.

The Deaf Awareness Club of Newark, N.J., will hold a meeting on Saturday the 2nd from 1:30pm to 3pm, in the Special Services Room, which is located on the third floor of the main library. Refreshments will be served, and Deaf Awareness Club polo shirts (\$18.00) and T-shirts (\$10.00) will be available for purchase.

Free computer classes—in English and Spanish—are being held in the Technology Training Center, which is located on the third floor of the main library. Class size is limited to ten participants.

Some classes are designed for first-time computer users (Mouse Clinic, Typing), while others are for those with more computer literacy (Word Processing, Email, Blogging, Internet, Creating a Résumé). For more information on the calendar of classes for the month, please call 973-733-3603, or visit www.npl.org/Pages/Computers/.
