Project Python
Overview

Description:
Project Python is an introduction to computer programming and the Python programming language. It is made possible through teaching space generously donated to the New Jersey Computer Science Student Alliance (NJCSSA) by the Newark Public Library. Each week there will be two classroom sessions and two lab sessions. The class will span a total of 10 weeks. You'll learn how to program and to become an independent learner so you can do great things on your own!

Dates: Monday February 3 - Thursday April 9

Times:
Mondays 4-5:15pm class
Tuesdays 4-5:30pm lab
Thursdays 4-5:30pm class
Saturdays 3-4:30pm lab
[This schedule will be adjusted for school holidays in February. See next page for list of class/lab dates.]

Location:
Newark Public Library, 5 Washington Street, Newark, NJ 07102

Cost:
Free - but students and their parents/guardians must make a commitment to attend classes and labs

Required Materials:
None - laptops and software will be provided

Homework:
No required homework, but students are encouraged to keep learning at home

Class Requirements

In this small class, the willingness of students to actively participate and collaborate will be very important to creating a fun learning environment. Attendance is also important because each class and lab will build upon the previous session.

- I understand that my student can be dismissed from class for uncooperative behavior (including not listening, not paying attention).
- I confirm that my student will be at classes and labs on all scheduled days. If he/she cannot make it for some reason, I will notify Ben Campbell at the email address listed above stating the reason and to arrange makeup dates.
